PRODUCT
CATALOGUE

Czanieckie Makarony Sp. z o.o. is a polish company established in 1990 by Władysław and Zbigniew Dybał. From the very beginning, its activities have been based on family values, with the third generation sitting on the Management Board. The team has grown from a few family members to over 250 employees. We have been producing pasta with passion and care for over 30 years, using the best recipes and technology.

Our pasta products are available throughout Poland and abroad, including the UK and the USA. We offer four product lines, which allows for culinary experimentation and to suit the tastes of even the biggest gourmets.

We have modern production facilities and a laboratory, which guarantees the highest quality products. Since 2008, we have been BRC-certified (international standard for food safety), and we also meet the requirements of IFS Food at a higher level and the Global Standard for Food Safety.

EGG PASTA

Czaniecki egg pasta has been produced using traditional recipes for years. The pure composition of our products enables a return to the flavours associated with homemade, hand-made egg pasta.

In addition to the high egg content and high quality wheat flour, the pasta products in this line are additionally enriched with durum wheat, which adds to their nutritional value.

Our range includes dozens of pasta shapes that are perfect for soups, sauces, casseroles and pasta salads.

EGG PASTA

100% DURUM PASTA

The Czaniecki 100% durum line is pasta made from the highest quality semolina, a hard wheat flour known as durum. Our pasta contains only this flour and water in its composition.

Durum wheat flour is valued for its nutritional properties and the culinary possibilities it offers. Thanks to the addition of durum wheat flour, the pasta remains elastic and can be used in a wide variety of dishes.

In the 100% durum line, we offer pasta shapes that work well in many dishes loved by pasta lovers - from the classic Italian spaghetti bolognese to traditional soups.

PASTA WITH FIBRE

Czaniecki pasta with fibre in its composition contains semolina (durum wheat semolina) and a 9% addition of oat fibre. Fibre is an ingredient that has a beneficial effect on the entire organism, in particular supporting the proper functioning of the digestive system.

Pasta with fibre combines traditional taste with health benefits. The variety of available shapes makes it possible to use them in dishes characteristic of various cuisines - they will prove useful both in salads with favourite ingredients and in the company of well-liked sauces.

CZANIECKI kids

Czaniecki KIDS is a pasta created especially for children. Fun shapes – letters, stars, animals and braids – encourage children to discover the world of flavours, while the simple, clean ingredients give parents confidence in the proven quality. It is a combination of healthy ingredients, joy and culinary adventure on a plate.

The line includes two five egg pasta shapes – letters and stars – made exclusively from barn eggs. This gives them a natural flavour, rich nutritional value and safety that parents appreciate. It is a traditional, homemade taste in a form that children love.

The range also includes two types of pasta made from 100% durum wheat – animals and braids. They are springy and easy to eat and digest, making them ideal for children's diets. They are a source of natural energy that supports children's activity and concentration, and are suitable for both quick dinners and healthy lunchboxes.

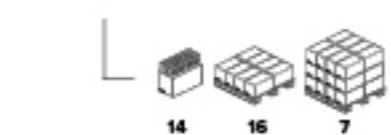

Czaniecki KIDS is a guarantee of quality that parents trust and shapes that children will love.
